

DULUX[®] SURFACESHIELD[®]

HD-H - Heavy Duty Horizontal Anti Graffiti
Treatment

DULUX® SURFACESHIELD® HD-H

Surfaceshield® HD-H (heavy duty - Horizontal) is a waterborne surface treatment for preventing the adhesion of dirt, chewing gum, graffiti and pollution to horizontal surfaces to facilitate easier cleaning. Surfaceshield HD-H penetrates the surface pores and offers invisible long term surface protection in a single application. Contaminants on surfaces protected with Surfaceshield HD-H can be removed using water pressure, making it the ideal solution where economic maintenance cleaning is desired.

Surfaceshield HD-H meets stringent VOC regulations.

USES

Surfaceshield HD-H is particularly suitable for concrete and other porous pavement materials such as stone, concrete and terracotta pavers and non glazed tiles in public spaces, footpaths, stairs, underpasses, overpasses, and car parks.

FEATURES

- Barrier against water, greasy deposits, pollution and chewing gum
- Invisible - does not change surface appearance
- Vapour permeable
- Low VOC – less than 1g/litre

BENEFITS

- Easy and quick to apply by spray
- Allows fast and cost effective removal of most forms of contamination
- Helps keep assets clean
- Maintains asset value

PERFORMANCE GUIDE

Weatherability	Excellent
VOC Level	< 1g/litre
Water Resistance	Excellent resistance to fresh and salt water. Not suitable for immersion
Abrasion Resistance	Very good
Solvent Resistance	N/A

APPLICATION

Conventional, airless spray or air assisted spray
