Building Product Information Sheet

About this form

This template has been developed to help manufacturers and importers into Aotearoa New Zealand provide the information required by the **Building (Building Product Information Requirements) Regulations 2022**.

How to use

- › Download and save this form in your computer.
- › Fill out the form with the relevant information about your product.
- › You may use this filled out form and publish it on your product web page.

Types of building products

There are two classes of designated building products with different information requirements for each. The below summarises the information that must be provided for each class of product and when the information must be made available.

Class 1: Batch or mass-produced products

Batch or mass-produced products that are typically available for retail or wholesale purchase. For example, cladding products, mechanical fixings, insulation products, internal lining, roofing products, structural wood-based products, structural steel and reinforcing products, sanitary plumbing, and drainage products, including tapware (note: this is not an exhaustive list).

Class 2: Custom-made lines of products

Custom-made lines of products that are made to order to client specifications. For example, external window joinery and doors that have been customised to the specifications of individual clients (for example, specifications on dimensions and glass type).

MBIE provides resources to support manufacturers, importers, wholesalers, distributors, and retailers to understand what their obligations are, and how to meet them.

For more information, visit **Building product information requirements | Building Performance**

Background

The Building Amendment Act 2021 introduced new minimum information requirements for building products to support better informed decision-making by building consent authorities, building owners, builders, and designers. The new regulations designate several building products for which building product information must be provided and establish the minimum requirements for that information.

The new regulations will ensure better and more consistent information is available for these products, helping inform building consent authority decisions on building consent applications. This should result in fewer requests for information, and therefore faster processing times. In addition, the requirements will ensure people, including homeowners, are given the information they need to make good decisions about products, and use and maintain them as intended.

Please note that The Ministry of Business, Innovation and Employment (MBIE) is not responsible for the input details provided in the template.

Class 1

Building Product Information Sheet

Product name (include the brand name):

Dulux Luxathane® HPX

Product description and its intended use (measurements, materials, usage):

LUXATHANE® HPX is a high performance full gloss, two-component acrylic polyurethane that is recoatable with minimum surface preparation. It is formulated for use in industrial, chemical and marine environments where excellent gloss and colour retention during extended service periods are required. The smooth, durable, high gloss finish is ideal for steelwork and facades of commercial projects, such as retail complexes and high rise offices and apartments. This versatile product is equally suitable for new construction and maintenance over properly primed steel, galvanised steel, aluminium, concrete, hardwood timber and MDF. LUXATHANE® HPX can be used directly over all Dulux® epoxy primers, universal primers, high-build epoxy intermediate coats and to aged, tightly adhering coatings subject to necessary solvent resistance tests and appropriate surface preparation. LUXATHANE® Accelerator is available for use with standard hardener to promote faster drying.

Product identifier (if applicable):

(This could be a Global Trade Item Number (GTIN) or quick response code (QR code), or any other distinguishable part/model number or identifier.)

Place of manufacture: ☐ Aotearoa New Zealand ☒ Overseas

Legal and trading name of the manufacturer(s):

DuluxGroup (Australia) Pty Ltd

Address for service:

STREET NAME	1477 Ipswich Rd	SUBURB	Rocklea
CITY, COUNTRY	Queensland, Australia	POSTCODE	4106

Relevant Building Code clauses:

AS/NZS 2312.1:2014 Guide to the protection of structural steel against atmospheric corrosion by the use of protective coatings - Part 1: Paint coatings

Provides guidance for architects, engineers, builders, the surface coating industry and users of protective services in general, on paint coating systems for the protection of steel work against corrosion. The designer can choose from a selection of systems based on expected service life to first maintenance for various environments. The systems recommended herein are based on good industrial practice and usage; however, local knowledge of any corrosion problem should influence the decisions taken. In providing recommendations on up-to-date protection systems, the Committee is aware of the large number of systems used commercially, but, to avoid confusion, has included only a limited range of systems for each type of environment.

Statement on how the building product is expected to contribute to compliance:

- options for compliance set out in section 19 of the Act (regulations, acceptable solution, verification method)
- standard or technical document that describes the performance of the building product or the relevant specifications to which the building product was manufactured
- physical properties of the building product
- how the building product is intended to be used.

Limitations on the use of the building product:

1. Application - in shop application (not for site application)
2. Product Datasheets ([click here](#))
3. Product Safety Sheets ([click here](#))

Design requirements that would support the appropriate use of the building product:

1. Unique project specific specification - provides details of the approved system including primers and top coats
2. Product Datasheet ([click here](#))

Installation requirements *(also provide link to the product installation guide):*

[Product Data Sheet \(click here\)](#)

Maintenance requirements *(also provide link to the product maintenance guide):*

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?:

☐ Yes ☒ No

If yes, description of the warning or ban under section 26:
